New York Candidates Survey

New York Gubernatorial Race 2022

1. Will you take action to assure adults can make vaccination decisions for themselves free from all types of coercion? If yes, what type of action?

(yes /) no

End all mandates with executive orders and establish policy explicitly stating that all government

medical bodies are for advice and not for regulation creation.

2. Will you take action to assure parents can make vaccination decisions for their minor children free from any and all types of coercion? If yes, what type of action?

(yes /) no

End all mandates with executive orders and establish policy explicitly stating that all government

medical bodies are for advice and not for regulation creation.

3. Will you end the Covid State of Emergency?

(yes /) no

Mandates and lockdowns are unconstitutional and in the long run do more harm than good. I would never support either and I'm on record from as early as March 2020. In addition, religion is part of the 1st amendment and must always be protected. Individuals own their own bodies and lives. All edicts from the past Governor and from government committees/boards/bodies can and should be countermanded by the new Governor. Also, we should try to make whole those who were adversely affected by these edicts.

Finally, the legislature needs to know that any laws that conflict with the above ideas will be vetoed. This statement should answer the rest of the questions.

4. Will you take action to assure that applicants for religious exemptions to vaccination do not undergo interrogation, scrutiny or judgment, and are not forced to defend their religious beliefs? If yes, what type of action?

yes / no

_____

_____

_____
